Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

Group I; Claims 1-11 are drawn to a subcombination ramp/plate member for a magnetic head suspension system in magnetic disk drive, classified in Class 360, subclass 254.7.

Group II; Claims 12-19 are drawn to a subcombination rectifier plate for a magnetic disk drive, classified in Class 360, subclass 97.02.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination invention II has separate utility by itself as a turbulence reducing plate in a magnetic disk drive without the structure of the ramp member. See MPEP § 806.05(d).

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by

Art Unit: 2627

their different classification, and require divergent fields of search, restriction for examination purposes as indicated is proper.

3. Telephonic contact was attempted to be made with Mr. W.L. Brooks on 14 June 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

5. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed(37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to A. J. HEINZ
